

# GetaKit HIV Self-Test Results

GetaKit is status neutral. This means you will be connected with support whether your results are positive or negative.

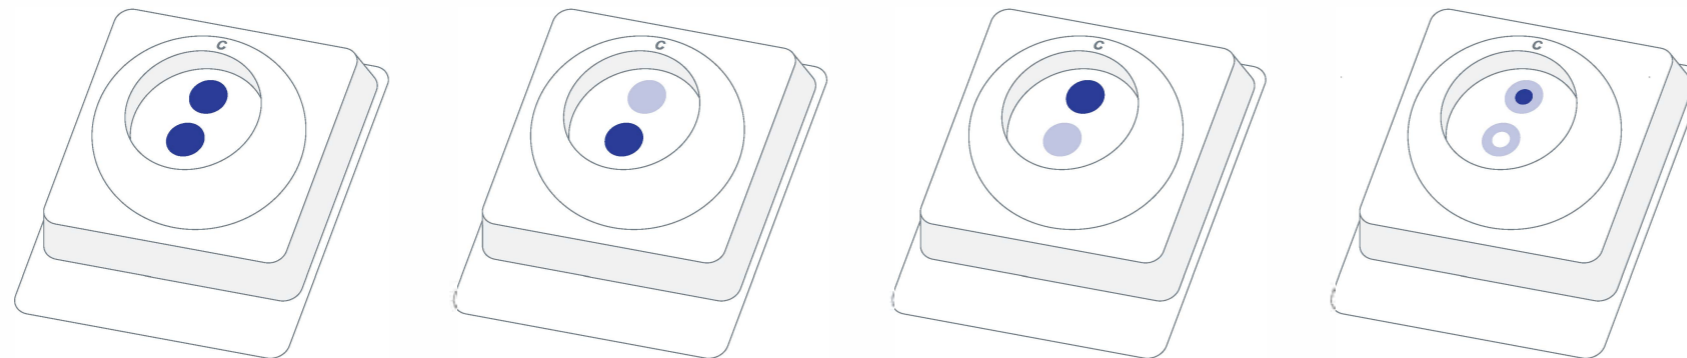

## ONE BLUE DOT ON TOP

## NEGATIVE

- Report your negative result on GetaKit.ca
- Repeat testing 3 months after a contact of concern

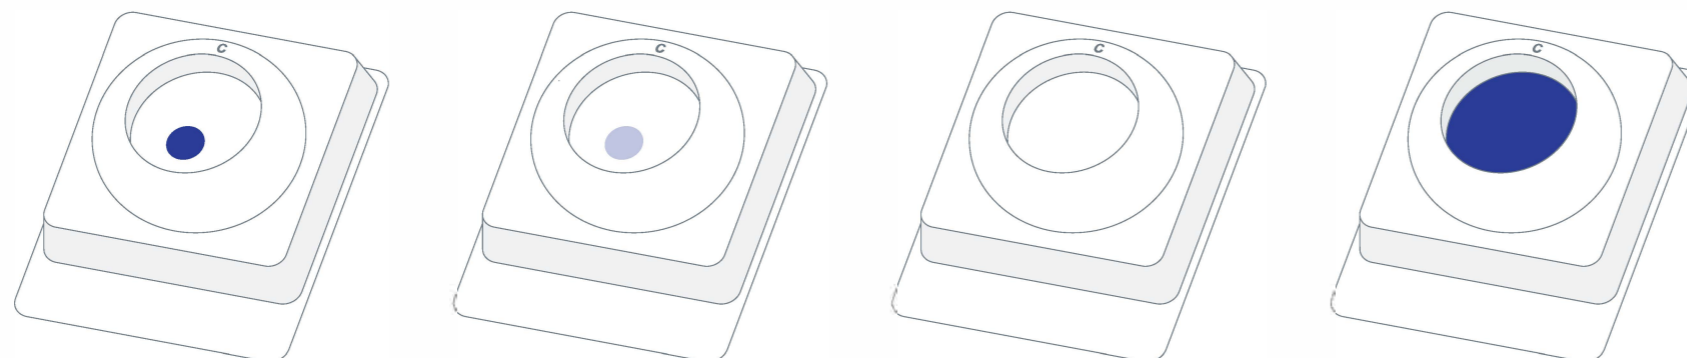

## TWO BLUE DOTS

## POSITIVE

- Report your positive result on GetaKit.ca
- A positive result is considered as a preliminary diagnosis and must be confirmed by a blood test

## OTHER RESULTS

## INVALID

- Report your invalid result on GetaKit.ca
- Order a new kit
- If your test shows an invalid a second time, complete an HIV blood test
